Company Overview

The leading independent offshore marine company

Iran Fajr Shipping and Marine Service (IFSM) is a leading global oilfield services company that provides logistic and platforms services and export of crude oil and condensate to a substantial and diversified client base. Founded in 1995 in Tehran, Iran, the firm is headquartered in Tehran. IFSM services national and international oil companies and integrated service providers, both onshore and offshore and is presently involved in exploration, development, deep offshore, HP/HT wells. As such, IFSM invests and purchase four (4) vessels with a target to implement the EPD contract in offshore, In line with its strategy to be the leading internal operator of choice for companies to the oil and gas industry, IFSM focuses on those markets where its leadership in highly complex drilling projects is required and recognized. These typically include deep-water, deep-onshore and horizontal drilling with extended reach as well as compartmental reservoir.

In accordance with exponential growth of activities, better response in customer oriented basis, advancement of activities quality and caring out the employment opportunities, the company has established other branches in different ports inside and outside of country.

This company started his business by using many crew boat, tug boat and barge, but gradually based on existing requirements, customers ever-increasing requests in shipping, marine services especially in developing oil and gas fields, Kharg in Persian Gulf and Neka in Caspian sea terminals stepped to purchase more appropriate vessels, so it can provide and response most of mentioned requirements on behalf of customers.

Vision

- Supplying conveyance of marine services in accordance with applications of our countries territories countries and international levels.
- Observing international standards
- Acquiring the highest echelons of managing standards with emphasis on marine security.
- Leading the company among the pioneer countries.

Mission

- To help our clients make quantified, informed, substantial improvements
- To constantly build a leading edge service company
- To respect and improve the highest safety and environmental standards
- Development and know-how of the countries in which we operate.

Management Systems & Compliance

The Management Systems & Compliance dept. ensures IFSM's compliance to the national and international legislative and regulatory requirements, and manages IFSM's Integrated Management System (IMS) and Document of compliance (DOC) which is certified to ISM, ISO14001, ISO 9001 and Green Marine. As well, the Management Systems & Compliance dept. provides oversight and management of all data management systems IFSM's platform for tracking and managing action plans.

In addition to the above, Management Systems & Compliance is responsible for conducting internal QHSSE audits on vessels and shore facilities, and liaising with external statutory bodies, auditors and charterer's representatives to facilitate third party audits.

Top Management is fully committed to HSE issues through constant personal involvement i.e. review meetings, audits, provision/assignment of training, amongst others. Furthermore, IFSM corporate HSE policy statement is issued directly by the President of the Company, Mr. Dastaran. Given the importance of HSE in IFSM operations its structure has been growing with the increase of IFSM presence worldwide: from field staff to base personnel, with direct reporting lines into the central HSE team.

HSE & Quality

HSE Capabilities

Our vision at IFSM is to make measurable improvements in the health, safety and environmental (“HSE”) aspects of our services and operations and to do so continually. As such, IFSM’s HSE requirements are:

- **No personal injuries**
- **No accidents**
- **No environmental damages**

IFSM has been certified in ISO 14001:2004 for Environmental Management System for both for office and rig site activities. This demonstrates that IFSM operations are managed efficiently and responsibly, providing reliable services to its clients free of downtime associated with QHSE matters.

Some of the major benefits of having a unique integrated certified system worldwide are:

- To provide more effective operational service to our clients
- To provide more efficient support to our rig site operations
- To have standardized planning and procedures worldwide, enabling IFSM to work at the highest standards available on the market
- To have an integrated system that encompasses both office and rig site personnel participation
- To have an active system for continuous improvement

Quality Capabilities

IFSM Quality Management system is certified in ISO 9001:2008. This allows IFSM to integrate with its certificates in ISO 14001:2004. This integration between the three standards helps IFSM to have a fully operational QHSE Management system with the objective of achieving excellence in QHSE performance. To ensure the QHSE Management system is in place in the certified bases, IFSM has trained several of its employees as internal auditors in the ISO & OHSAS standards, in which IFSM is certified.
